Battlecruisers John Roberts 1997 This second volume in the ShipShape series covers the development of one of the largest, fastest and most charismatic warship types. Combining the armament of a battleship with the speed of a cruiser in some of the largest hulls then built, these ships were the cutting edge of early 20th-century naval technology. The brainchild of Admiral Fisher, the concept of this class began as large, fast armoured cruisers for trade protection, but the last-minute decision to equip them with 12-inch guns led them to be seen as a high-speed element of the battle fleet. The British battlecruisers fought in numerous battles in World War I, such as the battles of the Falklands, Heligoland Bight and Dogger Bank. But it is for the battle of Jutland in 1916, when three battlecruisers exploded and sank in one day, that these ships are best remembered.

Diplomatic Ramifications of Unrestricted Submarine Warfare, 1939-1941 Janet M. Manson 1990 Manson considers the political, economic, legal, and military rationale for the United States' decision on December 7, 1941, to adopt a policy of unrestricted submarine warfare, reversing its previous foreign policy that had centered on the "freedom of the seas" concept. Germany's rejection of this policy had been one of the chief reasons for U.S. entry into World War I. The volume provides multinational perspectives based on multiarchival research, incorporating much previously unavailable historical material.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Naval Shipbuilders of the World Robert J. Winklareth 2000 While the design and service histories of warships are well covered in print, there is no single-volume guide to the companies and state yards that built them. This work is designed to fill the gap. The core of the book is made up of potted biographies of the shipbuilders, describing their corporate development, highlights in their histories, and listing the major ships they built. The book is international in coverage, divided by country, by region and by yard, with maps and plans showing the main areas, the locations of the yards, and the ground layout of the most important builders at significant dates in their history.

Fibreglass Boats Hugo du Plessis 2005-12-01 Since it was first published 40 years ago Hugo du Plessis' *Fibreglass Boats* has become a classic, relied upon by owners, surveyors and boat builders keen to understand how fiberglass behaves, and obtain practical advise on

working with GRP. In a deliberately non-technical manner, he explains the peculiar nature of fiberglass, its durability, its weaknesses, where it is likely to fail, the effects of use and the weather, plus the latest research into causes of the biggest worry for owners - blistering and osmosis. This masterly work will continue to be an invaluable source of reference for anyone wanting practical advice on working with GRP, in order to make repairs and improvements correctly and thus extend the life of their boat.

The Voyage of the CSS Shenandoah William C. Whittle 2005-05-08 "The Confederate cruiser Shenandoah was the last of a group of commerce raiders deployed to prey on Union merchant ships. Ordered to the Pacific Ocean to "greatly damage and disperse" the Yankee whaling fleet in those waters, the Shenandoah's successful pursuit of her quarry compares favorably with the exploits of the more celebrated Alabama and Florida but has never been as well known because it coincided with the war's end. It was, however, one of the best documented naval expeditions - from England to the Indian Ocean, Australia and the South Pacific, the Bering Sea, San Francisco, and finally to port in Liverpool - during the Civil War."--BOOK JACKET.

U.S. Cruisers Norman Friedman 1984 This fully illustrated series offers detailed descriptions of the evolution of all classes of the principle U.S. combatant types, as well as plans, profiles, and numerous detailed photographs.

Austro-Hungarian Warships of World War I René Greger 1976 "Although the Austro-Hungarian Navy was never one of the world's mightiest fleets, it often fought successfully against superior enemies, as at the battle of Lissa in 1866. In World War I the Italian fleet was again much bigger, nevertheless, the Austro-Hungarian Navy was held in such respect by the Allies that the Italian Navy was further strengthened by British and French battleships, cruisers, destroyers, submarines and patrol vessels. Even so, the 'Imperial and Royal Navy' still succeeded in guarding its coasts against invasion and protecting the supply lines of the Austrian Army on the Albanian front. At the same time its own light forces, submarines and seaplanes attacked Allied bases and shipping routes right up to the end of hostilities..."--Publisher description.
