My Father's War Adriaan van Dis 2004 Born in Holland after the war, a son grows up an outsider in the midst of his family. Living in isolation among the dunes of coastal Holland, he looks on as his Indonesian father and sisters are mocked for their 'yellow skin', endures the bizarre and brutal military training his father puts him through, and wonders about the hardships his family suffered but never discusses. Years later, the middle-aged son begins a quest into his family's past in Indonesia, and the origins of his father's strange mix of charm and cruelty. Despite his sister's denial and his mother's evasiveness, details surface about the incredible endurance of his father, one of the few survivors of torture in the camp. Returning always to the Dutch coast where he spent his childhood, the man comes to a final acceptance of his father and a new understanding of their relationship.

Losing Hope Heidi Lis 2017-03-18 For the last year and a half, you could sum up my life in one word... disastrous. One simple phone call was all it took to change my life forever. If I could go back and do it again, what would I change? Everything. What should have been one of the best days of my life turned into the absolute worst. Cast in a shadow that turns my days dark, and my nights even darker. Before I can put the pain of the past behind me, I need to fix what's broken. The first step is believing it can be done, the second is forgiveness. But forgiveness doesn't come easy, least of all for who is to blame. For every choice, there are consequences. Some good. Some bad. Some simply unforgivable. One poor choice made me the target of a sociopath. And once again, I'm reminded just how cruel life can be. But.... I've come to learn after every storm, the sun shines again And, someone taught me life is only worth living if you smile. It took almost losing him for me to understand. What would I change? Everything, but him! Losing Hope is a standalone New Adult Contemporary Romance dealing with love, loss, grief and betrayal, but also ends with a HEA. *Logic Programming* Marcus J. Lambert 2014 Prolog for logic programming is one of the most intensively studied software languages in the 1980s. During the same period, the data-flow model for parallel computation attracted a lot of attention of researchers in the computer science; hence, it was very natural that several approaches were tried toward combining the two and implementing logic programs in parallel machines with the data-flow architecture. These approaches, however, were rather indirect ones in the sense that they developed programs describing AND/OR-parallelism for deduction using a data-flow language and executed them in a data-flow computer, and yet did not devise a direct model for parallel execution (reasoning) of a logic program. This book discusses fuzzy logic inferencing for Pong; dislog; SEProlog; and provides direct graphical representations of first-order logic for inference.

*The Numinous Legacy* Adair Butchins 2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha
