The Odyssey of a New Religion Phillip Charles Lucas 1995-02-22 "... solid scholarship.... [It] will not only serve as a model for those studying the New Religious Movements of the late twentieth century, but will offer help to mainline and other religious institutions who are struggling with problems of identity and change in our complex society today." -- Church History "... a thoroughly enjoyable book that would fit well into a graduate readings seminar on new religious movements...The book deserves a wide reading." -- Nova Religio "Lucas's study provides a model of how best to combine the methodologies and analyses of the history of religions and sociology. He has provided the groundwork for continued tracking of developments in this new religious movement for comparative purposes." -- Journal of the American Academy of Religion "... a carefully researched and well-written history of one of the important new religious movements to appear in the United States during the 1960s... the volume can be heartily recommended to all students of American religion." -- American Historical Review "Lucas has written one of the best informed studies of the evolution of a metaphysical cult into mainline eastern orthodoxy." -- The Reader's Review "This is an important book for libraries with holdings in American religion." -- Choice "... a fascinating narrative... a rich feast for the investigator of the subculture of esoteric religion..." -- American Studies International "... especially welcome. It offers an in-depth, meticulously documented history of a church, the Holy Order of MANS, that arose from the Christian esoteric mystery tradition and then metamorphosed into a traditionalist Orthodox Christian sect. This unlikely tale has more twists and turns than a whodunit... this volume is that rarest of finds: an academic book that is a delight to read." -- Gnosis Magazine Traces the journey of a new religious movement from its start as a monastic-style New Age order to its transformation into the more conventional Christ the Savior Brotherhood, an Eastern Orthodox sect. A remarkable story of social and spiritual change in contemporary America.

The Game Neil Strauss 2005-09-06 Hidden somewhere, in nearly every major city in the world, is an underground seduction lair. And in these lairs, men trade the most devastatingly effective techniques ever

invented to charm women. This is not fiction. These men really exist. They live together in houses known as Projects. And Neil Strauss, the bestselling author, spent two years living among them, using the pseudonym Style to protect his real-life identity. The result is one of the most explosive and controversial books of the year -- guaranteed to change the lives of men and transform the way women understand the opposite sex forever. On his journey from AFC (average frustrated chump) to PUA (pick-up artist) to PUG (pick-up guru), Strauss not only shares scores of original seduction techniques but also has unforgettable encounters with the likes of Tom Cruise, Britney Spears, Paris Hilton, Heidi Fleiss, and Courtney Love. And then things really start to get strange -- and passions lead to betrayals lead to violence. *The Game* is the story of one man's transformation from frog to prince -- to prisoner in the most unforgettable book of the year.

The New World (dis)Order Charles Giuliani 2009-02-04 The world is run by very different people than the visible political puppets that smile at the cameras. And these hidden elites have a terribly sinister agenda for global domination, working from behind the curtain. This book exposes how these criminals operate, controlling our media, education system, government, banking system--and yes, even our churches--to keep us in ignorance as to what they are up to. After reading this study, you will never view the world the same way again.

Hippocrates Now Helen King 2019-11-14 This book is available as open access through the Knowledge Unlatched programme and is available on www.bloomsburycollections.com. We need to talk about Hippocrates. Current scholarship attributes none of the works of the 'Hippocratic corpus' to him, and the ancient biographical traditions of his life are not only late, but also written for their own promotional purposes. Yet Hippocrates features powerfully in our assumptions about ancient medicine, and our beliefs about what medicine – and the physician himself – should be. In both orthodox and alternative medicine, he continues to be a model to be emulated. This book will challenge widespread assumptions about Hippocrates (and, in the process, about the history of medicine in ancient Greece and beyond) and will also explore the creation of modern myths about the ancient world. Why do we continue to use Hippocrates, and how are new myths constructed around his name? How do news stories and the internet contribute to our picture of him? And what can this tell us about wider popular engagements with the classical world today, in memes, 'quotes' and online?

Introduction to Old Order and Conservative Mennonite Groups Stephen Scott 1996-01-01 This book tells a story which until now has not been available in such an interesting and comprehensive form. What holds these people together? Why are they growing in number? Where do they live? The Old Order Mennonites are less well known than the Amish, but are similar in many beliefs and practices. Some Old Order Mennonites drive horses and buggies. Others use cars for transportation. Conservative Mennonite groups vary a great deal, but in general espouse strong faith and family life and believe that how they live should distinguish them from the larger society around them. The author details courtship and wedding practices, methods of worship, dress, transportation, and vocation. Never before has there been such an inside account of these people and their lives. The author spent years conferring and interviewing members of the various groups, trying to portray their history and their story in a fair and accurate manner. An enjoyable, educational, inspiring book.

Balkan Family Structure and the European Pattern Maria N. Todorova 2006-01-01 This study, which is an updated, extended, and revised version of the out-of-print 1993 edition, reassesses the traditional stereotype of the place of the Balkans in the model of the European family in the nineteenth century on the basis of new source material and by synthesizing existing research. The work first analyzes family structure and demographic variables as they appear in population registers and other sources, and the impact of these findings on theoretical syntheses of the European family pattern. On most features, such as population structure, marriage and nuptiality, birth and fertility, death and mortality rates, family and household size and structure, as well as inheritance patterns, the Balkans show an enormous deal of internal variety. This variability is put in a comparative European context by matching the quantifiable results with comparable figures and patterns in other parts of Europe. The second section of the book is a contribution to the long-standing debate over the

Model Driven Engineering Languages and Systems Dorina C. Petriu 2010-09-21 The MODELS series of conferences is the premier venue for the exchange of innovative technical ideas and experiences focusing on a very important new technical discipline: model-driven software and systems engineering. The expansion of this discipline is a direct consequence of the increasing significance and success of model-based methods in practice. Numerous efforts resulted in the invention of concepts, languages and tools for the definition, analysis, transformation, and verification of domain-specific modeling languages and general-purpose modeling language standards, as well as their use for software and systems engineering. MODELS 2010, the 13th edition of the conference series, took place in Oslo, Norway, October 3-8, 2010, along with numerous satellite workshops, symposia and tutorials. The conference was fortunate to have three prominent keynote speakers: Ole Lehrmann Madsen (Aarhus University, Denmark), Edward A. Lee (UC Berkeley, USA) and Pamela Zave (AT&T Laboratories, USA). To provide a broader forum for reporting on scientific progress as well as on experience stemming from practical applications of model-based methods, the 2010 conference accepted submissions in two distinct tracks: Foundations and Applications. The primary objective of the first track is to present new research results dedicated to advancing the state-of-the-art of the discipline, whereas the second aims to provide a realistic and verifiable picture of the current state-- the practice of model-based engineering, so that the broader community could be better informed of the capabilities and successes of this relatively young discipline. This volume contains the final version of the papers accepted for presentation at the conference from both tracks.

Normative Patterns and Legal Developments in the Social Dimension of the EU Ann Numhauser-Henning 2013-06-28 This book explores the normative and legal evolution of the Social Dimension - labour law, social security law and family law - in both the EU and its Member States, during the last decade. It does this from a wide range of theoretical and legal-substantive perspectives. The past decade has witnessed the entering into force of the Lisbon Treaty and its emphasis on fundamental rights, a new coordination regulation within the field of social security (Regulation 883/2004/EC), and the case law of the Court of Justice of the European Union in the so-called Laval Quartet. Furthermore structural changes affecting demographics and family have also challenged solidarity in new ways. The book is organised by reference to distinct 'normative patterns' and their development in the fields of law covered, such as the protection of established groups, the position of market functional values and the scope for just distribution. The book represents an innovative and important interdisciplinary approach to analysing EU law and Social Europe, and contributes a complex, yet thought-provoking, picture for the future. The contributors represent an interesting mix of well-known and distinguished as well as upcoming and promising researchers throughout Europe and beyond.

Women and Romance Susan Ostrov Weisser 2001-07 Romantic love has challenged and vexed feminist thought from its origins. Judging from the shelves of books advising women on love problems, there seems to be an ongoing difficulty in maintaining equality in romantic relationships. Does romance weaken or empower women? Why do women seem overwhelmingly attracted to romantic love in spite of raised consciousness in other areas of life that is a legacy of feminism? Have women always been seen as the sex which most seeks love and is best suited for love? These are some of the questions *Women and Romance: A Reader* seeks to address in bringing together a collection of texts specifically focused on the subject of women's conflicted but powerful urge to experience the pleasure and endure the pain of romantic love. The first anthology of its kind, *Women and Romance* includes historical as well as contemporary selections, personal letters as well as theoretical essays, and social science perspectives as well as literary criticism of the novel and the popular mass-market romance. Weisser lays out in systematic order for the first time the varying viewpoints and conflicted history of feminist views on romance, from Mary Wollstonecraft and Emma Goldman to Germaine Greer and Lillian Faderman. Introductions to each entry and section clarify the emerging themes of each era and of separate disciplines, while representing the views of traditionalists and anti-romance second-wave feminists alike. Contributors include: Charlotte Bronte, Barbara Bross, Eliza Southgate Bowne, Rita Mae Brown, Andreas Capellanus, Patricia Hill Collins, Simone de Beauvoir, Christine Delphy, Emily Dickinson, George Eliot, Lillian Faderman, Shulamith Firestone, Moderata Fonte, Mary Gaitskill, Charlotte Perkins Gilman, Emma Goldman, Vivian Gornick, Germaine Greer, Lynne Harne, bell hooks, Karen Horney, Carolyn Heilbrun, Audre Lorde, Tania Modleski, Gloria Naylor, Mary Poovey, Janice Radway, William Robinson, Jean-Jacques Rousseau, Jane Rule, Barbara Ryan, Ann Snitow, Elizabeth Cady Stanton, Gloria Steinem, Mary Wollstonecraft, Victoria Woodhull, Virginia Woolf.
