Choosing the Future for American Juvenile Justice David S. Tanenhaus 2014-05-02 This is a hopeful but complicated era for those with ambitions to reform the juvenile courts and youth-serving public institutions in the United States. As advocates plea for major reforms, many fear the public backlash in making dramatic changes. Choosing the Future for American Juvenile Justice provides a look at the recent trends in juvenile justice as well as suggestions for reforms and policy changes in the future. Should youth be treated as adults when they break the law? How can youth be deterred from crime? What factors should be considered in how youth are punished? What role should the police have in schools? This essential volume, edited by two of the leading scholars on juvenile justice, and with contributors who are among the key experts on each issue, the volume focuses on the most pressing issues of the day: the impact of neuroscience on our understanding of brain development and subsequent sentencing, the relationship of schools and the police, the issue of the school-to-prison pipeline, the impact of immigration, the privacy of juvenile records, and the need for national policies—including registration requirements—for juvenile sex offenders. Choosing the Future for American Juvenile Justice is not only a timely collection, based on the most current research, but also a forward-thinking volume that anticipates the needs for substantive and future changes in juvenile justice.

The Twenty-first Century African American Novel and the Critique of Whiteness in Everyday Life E. Lâle Demirtürk 2016-05-25 This book examines the post-9/11 African American novels, developing a new critical discourse on everyday discursive practices of whiteness. It examines not only how instances of racialization are generated through the embodied practices of whiteness in everyday interracial social encounters, but also how whiteness is "undone" by and through the black embodied practices of black people, who find different ways of practicing their agency to work for social change.

Feminist Surveillance Studies Rachel E. Dubrofsky 2015-05-15 Questions of gender, race, class, and sexuality have largely been left unexamined in surveillance studies. The contributors to this field-defining collection take up these questions, and in so doing provide new directions for analyzing surveillance. They use feminist theory to expose the ways in which surveillance practices and technologies are tied to systemic forms of discrimination that serve to normalize whiteness, able-bodiedness, capitalism, and heterosexuality. The essays discuss the implications of, among others, patriarchal surveillance in colonial North America, surveillance aimed at curbing the trafficking of women and sex work, women presented as having agency in the creation of the images that display their bodies via social media, full-body airport scanners, and mainstream news media discussion of honor killings in Canada and the concomitant surveillance of Muslim bodies. Rather than rehearsing arguments as to whether or not surveillance keeps the state safe, the contributors investigate what constitutes surveillance, who is scrutinized, why, and at what cost. The work fills a gap in feminist scholarship and shows that gender, race, class, and sexuality should be central to any study of surveillance. Contributors: Seantel Anais, Mark Andrejevic, Paisley Currah, Sayantani DasGupta, Shamita DasGupta, Rachel E. Dubrofsky, Rachel Hall, Lisa Jean Moore, Yasmin Jiwani, Ummni Khan, Shoshana Amielle Magnet, Kelli Moore, Lisa Nakamura, Dorothy Roberts, Andrea Smith, Kevin Walby, Megan M. Wood, Laura Hyun Yi Kang

Recognizing Race and Ethnicity Kathleen J. Fitzgerald 2018-05-15 Despite promising changes over the last century, race remains a central organizing principle in US society, a key arena of inequality, power, and privilege, and the subject of ongoing conflict and debate. In this second edition of *Recognizing Race and Ethnicity*, Kathleen J. Fitzgerald continues to examine the sociology of race and encourages students to think differently by challenging the notion that we are, or should even aspire to be, color-blind. Fitzgerald considers how race manifests in both significant and obscure ways by looking across all racial/ethnic groups within the socio-historical context of institutions and arenas, rather than discussing each group by group. Incorporating recent research and contemporary theoretical perspectives, she guides students to examine racial ideologies and identities as well as structural racism; at the same time, she covers topics like popular culture, sports, and interracial relationships. This latest edition includes an expanded look at global perspectives on racial inequality, including international migration and Islamophobia; updated examples of contemporary issues, including the Black Lives Matter movement; more emphasis on intersectionality, specifically the ways sexuality and race intersect; and an extended discussion on why the sociology of race and the sociological imagination matter. *Recognizing Race and Ethnicity* continues to reflect the latest sociological research on race/ethnicity and provides unparalleled coverage of white privilege while remaining careful not to treat "white" as the norm against which all other groups are defined.

Child Sexual Abuse Reported by Adult Survivors Sinéad Ring 2022-04-29 Child Sexual Abuse Reported by Adult Survivors is a wide-ranging and timely critical history and analysis of legal responses to 'historical' or 'non-recent' child sexual abuse (NRCSA) in England and Wales, Ireland and Australia, each of which represents an evolving and progressive approach to this important and complex issue. The book examines the emergence of NRCSA as a distinctive social, political and legal phenomenon in each country and explores the legal responses developed to address its unprecedented challenges. Courts and parliaments in each country have reformed existing doctrine and practice and have created new ways of holding state and private actors accountable and new ways of addressing survivors' injuries. Criminal law, tort law, public inquiries and state reparations have all been to the forefront of these new legal responses, which have transformed law's engagement with NRCSA survivors and understandings of justice itself. However, despite this undeniable progress, the book identifies ways in which the legal responses developed in each country fail to deliver accountability and recognition to NRCSA survivors and argues that such failures betray the law's inherent ambivalence to delivering justice for these survivors. Creating new insights into legal responses to this complex contemporary legal, social and political problem, this book will be of great interest to academic lawyers, political scientists and historians, as well as those working on related topics in criminology, sociology, social policy, cultural studies and gender studies.

Globalisation and the Challenges of Development in Contemporary India Sita Venkateswar 2016-03-14 This volume brings together multidisciplinary, situated and nuanced analyses of contingent issues framing a rapidly changing India in the 21st century. It moves beyond the ready dichotomies that are often extended to understand India as a series of contrasts and offers new insights into the complex realities of India today, thereby enabling us to anticipate the decades to come. The editors focus on three major themes, each discussed in a section: The first section, Framing the Macro-Economic Environment, defines the framework for interrogating globalisation and socio-economic changes in India over the last few decades of the 20th century spiraling into India in the 21st century. The next section, Food Security and Natural Resources, highlights critical considerations involved in feeding a burgeoning population. The discussions pose important questions in relation to the resilience of both people and planet confronting increasingly unpredictable climate-induced scenarios. The final section, Development, Activism and Changing Technologies, discusses some of the social challenges of contemporary India through the lens of inequalities and emergent activism. The section concludes with an elaboration of the potential and promise of changing technologies and new social media to build an informed and active citizenry across existing social divides.

Access to Justice in Magistrates' Courts Lucy Welsh 2022-01-27 This book examines access to justice in summary criminal proceedings by considering the ability of defendants to play an active and effective role in the process. 'Access to justice' refers not just to the availability of legally aided representation, but also to the ability of defendants to understand and effectively participate in summary criminal proceedings more generally. It remains a vital principle of justice that justice should not only be done, but should also be seen to be done by all participants in the process. The book is based on socio-legal research. The study is ethnographic, based on observation conducted in four magistrates' courts in South East England and interviews with both defence lawyers and Crown prosecutors. Setting out an argument that defendants have always been marginalised through particular features of magistrates' court proceedings (such as courtroom layout and patterns of behaviour among the professional workgroups in court), the political climate in relation to defendants and access to justice that has persisted since 2010 has further undermined the ability of defendants to play an active role in the process. Ultimately, this book argues

that recent governments have demanded ever more efficiency and cost saving in criminal justice. In that context, principles that contribute to access to justice for defendants have been seriously undermined.

Contesting Crimmigration in Post-hukou China Tian Ma 2022-08-11 This book focuses on the criminalization trend and process regarding the internal migration in contemporary China from the perspective Law-in-Action. In Chinese society today, internal migrants are commonly perceived as criminals. Crimmigration, a global term that communicated the convergence of the criminal legal system and the immigration enforcement system, manifest itself in China's hukou-based (also known as the household registration system) criminal legal system. How hukou has been constructed into the concept of Crimmigration in China strikes at the core of the ultimate questions of this book: who is being criminalized, how does the political-economic-cultural institution known as 'hukou' shape the criminal justice process, and how has the role of hukou changed over time in the ever-changing process? Drawing on interviews with police, prosecutors, criminal lawyers & judges, prison staff and migrant leaders in Yangtze River Delta, China, this book reflects on a historical development on hukou and its function in social control. Each chapter contributes to an extended analysis of pragmatic aspects of decision-making moments in the criminal justice system. This book will appeal to criminology researchers and students with interest in law, politics, migration, and citizenship in contemporary China.

The Development of Child Protection Law and Policy Kieran Walsh 2020-04-02 This book examines how child protection law has been shaped by the transition to late modernity and how it copes with the ever-changing concept of risk. The book traces the evolution of the contemporary child protection system through historical changes, assessing the factors that have influenced the development of legal responses to abuse over a 130-year period. It does so by focussing on the Republic of Ireland where child protection has become emblematic of wider social change. The work draws on a wide range of primary and secondary sources including legislation, case law and official and media reports of child protection inquiries. It also utilises insights developed through an extensive examination of parliamentary debates on child protection matters. These materials are assessed through the lens of critical discourse analysis to explore the relationship between law, social policy and social theory as they effect child protection. While the book utilises primarily Irish sources, this multidisciplinary approach ensures the argument has international applicability. The book will be a valuable resource for all those with an interest in the development of child protection law.

Fundamentals of Criminology Kelly Frailing 2013-07-19 *Fundamentals of Criminology: New Dimensions* delivers a comprehensive and comprehensible introduction to the discipline of criminology. As the title implies, it covers the fundamentals of criminology, including the major theories of crime causation, classic and current empirical tests of those theories, the strengths and weaknesses and the policy implications of each. It also describes the types of crime and provides current rates, trends over time and theoretical explanations for each, as well as a discussion of characteristics of offenders and victims. What sets this book apart from the many other fine criminology textbooks out there is its inclusion of some new dimensions of criminology. The new dimensions in this book include but are not limited to research designs in criminology, new theories of crime causation, crime in different contexts, connections between criminology and criminal justice policy and a number of lingering issues for both disciplines. In combination with the fundamentals, these new dimensions are designed to provide readers with the richest, most complete understanding of what crime is, how much of it there is, what causes it and what do to about it, as well as the ability and desire to pose important questions for the future of both criminology and criminal justice. "The authors have produced a comprehensive, readable, and thoroughly interesting text covering the topic of sociological criminology. Yes, there are a plethora of texts in this area, but Harper and Frailing's addition to the field has a number of features moving it ahead of the competition. There is in-depth coverage of emerging areas in crime, including cybercrime and human trafficking, as well as an excellent section on how disasters augment the opportunities for crime by hindering capable guardianship. The authors' arguments for evidence-based crime prevention strategies and public policies are compelling. *Fundamentals of Criminology* is worthy of the closest consideration by instructors teaching undergraduate criminology courses." — Jay Corzine, professor of sociology, University of Central Florida

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exonerated. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Ideology, Ethics and Policy Development in Public Service Interpreting and Translation Carmen Valero-Garcés 2017-03-08 This edited collection brings together new research on public service interpreting and translation (PSIT) with a focus on ideology, ethics and policy development. The contributions provide fresh theoretical and empirical perspectives on the inconsistencies in translation and interpreting provision observed in different geonational contexts and the often-reported tensions between prescribed approaches to ethics and practitioner experience. The discussions are set against the backdrop of developments in rights-based discourses on language support services and the professionalisation of the field, drawing attention to how stakeholders and interpreting practitioners navigate the realities of service in the context of shifting ideological landscapes. Particular innovations in the collection include theorisations about policy and practice that draw on political science, applied ethics and paradigms of trauma-informed care. The volume also presents research on settings that have received limited attention to date such as prison and charitable services for survivors of violence and trauma.

Re-thinking the Political Economy of Immigration Control Lea Sitkin 2019-10-17 This book offers a systematic exploration of the changing politics around immigration and the impact of resultant policy regimes on immigrant communities. It does so across a uniquely wide range of policy areas: immigration admissions, citizenship, internal immigration controls, labour market regulation, the welfare state and the criminal justice system. Challenging the current state of theoretical literature on the 'criminalisation' or 'marginalisation' of immigrants, this book examines the ways in which immigrants are treated differently in different national contexts, as well as the institutional factors driving this variation. To this end, it offers data on overall trends across 20 high-income countries, as well as more detailed case studies on the UK, Australia, the USA, Germany, Italy and Sweden. At the same time, it charts an emerging common regime of exploitation, which threatens the depiction of some countries as more inclusionary than others. The politicisation of immigration has intensified the challenge for policy-makers, who today must respond to populist calls for restrictive immigration policy whilst simultaneously heeding business groups' calls for cheap labour and respecting legal obligations that require more liberal and welcoming policy regimes. The resultant policy regimes often have counterproductive effects, in many cases marginalising immigrant communities and contributing to the growth of underground and criminal economies. Finally, developments on the horizon, driven by technological progress, threaten to intensify distributional challenges. While these will make the politics around immigration even more fraught in coming decades, the real issue is not immigration but the loss of good jobs, which will have serious implications across all Western countries. This book will appeal to scholars and students of criminology, social policy, political economy, political sociology, the sociology of immigration and race, and migration studies.

The Moral Geographies of Children, Young People and Food J. Pike 2014-11-25 This book takes Jamie Oliver's campaign for better school meals as a starting point for thinking about morally charged concerns relating to young people's nutrition, health and well-being, parenting, and public health 'crises' such as obesity. The authors show how these debates are always about the moral project of the self.
