Reference Guide to the International Space Station Gary Kitmacher 2010-11-01 The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

Bigfoot Field Work 101 William Jevning 2017-04-05 In creating the Bigfoot Field Work 101 series, my intention was to help both the serious minded person wishing to become involved in the subject of the Sasquatch and the novice who may not be particularly interested in investing a lot of time to the subject but who may come across evidence and may want to know what to do with it. I originally made each volume separate, for those wishing to only focus on specific areas of interest in the subject, but here in this single volume are all eight volumes. My hopes are that anyone entering the topic of Bigfoot or those currently involved can use the information contained here to help them get the most from their endeavors.

Enoch Autumn Williams 2010-05 As a child, Autumn Williams saw two hair-covered creatures standing in the woods behind her home in Washington State. She has spent her entire adult life seeking to understand why those non-human eyes held such an expression of human-like intelligence. What is the nature of a Sasquatch? Is it human? Animal? Or something in-between? How does Bigfoot live? How does it interact with others of its kind? And how would it interact with us? What would we learn about these creatures, if we stopped pursuing them... and they no longer avoided us? One man would finally offer answers to those questions. He is more than a witness. He is the friend of a wild man... and he calls him Enoch.

Once Upon a Time in Essex Big Foot 2016-08-04 There have been many versions of who, why and how, regarding events which took place on the night of the 6th December 1995, in Rettendon, Essex. The death of three men is all that is certain. They were notorious, violent and professional criminals. And they died on a lonely and deserted farmers track. In the middle of nowhere, unarmed. These are the only elements of the event, which are universally accepted. Two men are serving life on scant evidence. The convicted proclaim their innocence, yet appeal has been denied, or manoeuvred from grasp. Conspiracy theories are rife. Several films and a few accounts have clawed their way into existence; to be portrayed as factual accounts of the event. Fact or fiction, perhaps no longer relevant in the unforgettable and alluring story about the untimely demise of the gentlemen in question. Pat Tate, Craig Rolfe and Tony Tucker. They are dead, somebody knows why and how. They aren't talking. The legend, perhaps best, now becomes a fable. Corporal William Handley served in the Falklands war. A member of the legendary 22 Special Air Service regiment. D Squadron, Mountain Troop. It is not a forever career. He can't do Civvy Street. He joins the Metropolitan Police. Perhaps they should have turned him away. Someone in Special Branch thinks otherwise. Bill's career is nothing out of the ordinary. No spectacular rise through the ranks. Just a steady bloke, eventually becoming a sergeant in the Criminal Investigation Department. Out of a uniform, but not really. Hollywood's in Romford, the first big door for Tony Tucker. Not long before the bright lights of Bas Vegas, a few miles along the Southend Arterial beckon. More sensibly referred to as Basildon by Essex Police. Tucker and Tate's organisation and muscle grows rapidly. Fuelled by steroids, ecstasy and fast easy money. Essex is partying, the Essex Boys are cashing in. The power struggles spill out onto the street. Eventually getting the attention of the serious organised crime team. Trouble is the Essex Boys are always one step ahead. They're learning fast, got inside help. No one has the bottle to break ranks, give evidence. They pair have earned the right to step back from front line work. Not going down for a large possession, when there are so many mules to do the work for them. Eventually, if you push hard enough. There's going to be collateral. Any firefight, it's a given. The wrong person will go down, an innocent. It had all gone too far. They didn't care. They were too busy looking at the next big bit of work. This time they were helping themselves to someone else's prize. They had their eye off the ball. It was just a quick look, then on to dinner.

Shelters, Shacks and Shanties Daniel Carter Beard 2015-09-11 ÆIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight polesÑthat is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are

trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.
