Etruscan Civilization Sybille Haynes 2000 This comprehensive survey of Etruscan civilization, from its origin in the Villanovan Iron Age in the ninth century B.C. to its absorption by Rome in the first century B.C., combines well-known aspects of the Etruscan world with new discoveries and fresh insights into the role of women in Etruscan society. In addition, the Etruscans are contrasted to the Greeks, whom they often emulated, and to the Romans, who at once admired and disdained them. The result is a compelling and complete picture of a people and a culture. This in-depth examination of Etruria examines how differing access to mineral wealth, trade routes, and agricultural land led to distinct regional variations. Heavily illustrated with ancient Etruscan art and cultural objects, the text is organized both chronologically and thematically, interweaving archaeological evidence, analysis of social structure, descriptions of trade and burial customs, and an examination of pottery and works of art.

Figures of Speech Gloria Ferrari 2002-01-15 Over the past two hundred years, thousands of ancient Greek vases have been unearthed. Yet these artifacts remain a challenge: what did the images depicted on these vases actually mean to ancient Greek viewers? In this long-awaited book, Gloria Ferrari uses Athenian vases, literary evidence, and other works of art from the Archaic and Classical periods (520-400 B.C.) to investigate what these items can tell us about the ancient Greeks—specifically, their notions of gender. Ferrari begins by developing a theoretical perspective on visual representation, arguing that artistic images give us access to how their subjects were imagined rather than to the way they really were. For instance, Ferrari's examinations of the many representations of women working wool reveal that these images constitute powerful metaphors—metaphors, she argues, which both reflect and construct Greek conceptions of the ideal woman and her ideal behavior. From this perspective, Ferrari studies a number of icons representing blameless femininity and ideal masculinity to reevaluate the rites of passage by which girls are made ready for marriage and boys become men. Representations of the nude male body in Archaic statues known as kouroi, for example, symbolize manhood itself and shed new light on the much-discussed institution of pederastia. And, in Ferrari's hands, imagery equating maidens with arable land and buried treasure provides a fresh view of Greek ideas of matrimony. Innovative, thought-provoking, and insightful throughout, Figures of Speech is a powerful demonstration of how the study of visual images as well as texts can reshape our understanding of ancient Greek culture.

Castellani and Italian Archaeological Jewelry Susan Weber Soros 2004-01-01 During the nineteenth century in Rome, three generations of the Castellani family created what they called "Italian archaeological jewelry," which was inspired by the precious Etruscan, Roman, Greek, and Byzantine antiquities being excavated at the time. The Castellani jewelry consisted of finely wrought gold that was often combined with delicate and colorful mosaics, carved gemstones, or enamel. This magnificent book is the first to display and discuss the jewelry and the family behind it. International scholars discuss the life and work of the Castellani, revealing the wide-ranging aspects of the family's artistic and cultural activities. They describe the making and marketing of the jewelry, the survey collection of all periods of Italian jewelry on display in the Castellani's palatial store, and the Castellani's activities in the trade of antiquities, as they sponsored excavations, and restored, dealt, and exhibited antiques. They also recount the family's involvement in the cultural and political life of their city and country.
