Hospitality and Service Harry Katzan Jr. 2020-12-28 This book is a continuation of the study of service for beginning students of the subject and for persons that just want to know what it is. It is easy reading, suitable for a travel read or a beach read. It could serve as a source book for a person writing a bachelor's thesis. It could be useful for a manager whose service employees are not performing up to par. Millions of dollars are wasted every year by businesses, even though, they are first rate, their hospitality people act like unruly rascals. How do you start a service business? I wouldn't like to start one or bring one back after the misery of the pandemic world we have experienced in the past few years. What about the next few years? Politicians are constantly under fire, because they are perceived to be concerned with their own well being, instead of their constituency. What kind of service is the media providing, when they produce fiction rather than fact? Look at advertising and professional sports. Do you believe any of that stuff they produce in the way of news. This book is for the youngster who asks what his mother or father does all day. Do they just push people around, or do they help people achieve their true worth to the business or organization they represent. What about the car dealer that is constantly scrambling around for new business? What about some of the new stuff in business technology? Do we even know what we don't know? This book is for all of the above. I sincerely hope the book is a service to you. The Author December 17, 2020

One Simple Equation David N. Heizer 2020-03-17 The book *One Simple Equation* will take the reader on an inventive journey exploring Christian faith by introducing a revolutionary mathematical equation. An equation that helped the author, a devout atheist for forty-two years, discover and understand with complete clarity the truth of the Gospel and the power of God's love. After coming to the realization that some of the greatest most promising theories in modern science share the same narrative as the Biblical description of creation, God placed on author David Heizer's heart an equation that would ultimately bring him to Jesus Christ. The equation $E=TL^3$ is a simple expression of Christian faith. It is of profound importance that this book is rooted in God's love and His greatest expression of that love, Jesus Christ. The reader will learn why a mathematical expression of Christian faith illustrates our belief in God and Christ as our saviour so concisely. All people understand Mathematics making it a universal language understood by all regardless of race, nationality, ethnicity or language. $1+1=2$ is the same for all human beings. Math is also the language of God as all things in the universe, God's creation, can be expressed mathematically from the swirling motion of the planets and stars and the human genome to the computer programs and

phone apps we use every day. This fascinating equation will reveal to the reader Biblical truth and understanding. Inspired by Einstein's theory of relativity and God himself the equation is broken down into three simple terms: F representing Faith, what we are solving for. T representing Trust which is a variable that changes from one day to the next, and L representing God's Love a steadfast never changing never failing constant we can all rely on. Raising God's love to the power of three represents the Trinity, the Father, Son and Holy Spirit. The more Trust we apply to God's love, the greater our faith becomes. Read the testimonies of people getting through life's most difficult challenges by placing their trust in God's love. The reader will then be taken through a series of chapters that replace the constant love of God with other idolatrous terms such as money, material possessions, addictions and the self and how these temporary corruptible terms fail at producing a sound faith on which to build life giving principles. This one simple equation unlocks the meaning of life and answers one of the most difficult questions facing Christians today, "How can a loving God allow bad things to happen to good people?" This simple yet profound illustration of our faith reveals all this and much more.

The Little Book of Service Management Harry Katzan Jr. 2022-03-09 Service is the up and coming discipline for the 22nd century. But exactly what is service? Many people think that service is what people do - no more, no less. Nothing can be farther from the truth. Then, if so, why is the service community in constant disarray. Startup businesses fail on a regular basis. Why? They simply do not provide good service. Many persons in responsible positions rarely give service even a brief notice. What they subconsciously think about service has to be the truth. How often do you hear exclamations like, I'll never fly again, especially on that airline? What about, I've had it with fast food restaurants. Have you ever heard a student say, I'll never take another course from that professor? Or, it's a great car but the service stinks. What about, He may be a great doctor, but he treats all patients like they are not human. So, what do you do if you own or manage a small business and want to start off right? That's an easy question. You simply send new employees, or even experienced ones, to service school. You've heard of computer school, but have you heard of service school. There are books on computer, for example, all over the place. But, you probably have never seen one - a book, that is - about service. Is an automobile dealership the same as a pharmacy? At the service level, you can bet they are. This book will tell you all you need to know about providing great service. Have you ever heard of a 2-hour seminar on how to give good service? I bet you haven't. Sometimes, a manager will give suggestions, but that is about it. This book is a service resource. Have you experienced a doctor's office that calls a patient concerning what time his or her appointment is? Have you had a car dealer tell you they have lost your car? Has a doctor operated on the wrong leg? Maybe, even the wrong person. A service is a client/provider interaction that creates and captures value for both participants. We use service in several aspects of our lives, including business, government, education, health care, and religion. But, what exactly are the best practices, principles, and theories of service? The actual study of service is a relatively new field, but it is one that can open the door to a better understanding of the essential part of our lives. In this little book, Harry Katzan, Jr., founder and editor of the Journal of Service Science, offers a concise, readable examination of how managers can use information about services to construct a better customer environment. Harry Katzan, Jr. believes that the characteristics of a service process determine its efficacy in solving real-world problems.
