The Life Span Patricia C. Broderick 2014-01-08 The Life Span: Human Development for Helping Professionals, 4/e, provides an in-depth look at the science of human development, highlighting theories and research that have useful applications for individuals working in fields such as education, counseling, and social work. The main purpose of this book is to provide the reader with information that can be translated into professional "best practice" applications. Throughout, the text reflects the contemporary view that life span development is a process deeply embedded within and inseparable from the context of family, social network, and culture. Because the book is designed for graduate students, most topics, especially those that have special relevance to helping professionals, are covered in greater depth than in a typical life span text. The expanded coverage of research in these areas will enhance students' understanding of the scientific basis for application to practice. From reviews of the book: "This book is unique in that it is research-based, includes comprehensive coverage of important course topics, and offers helping professionals information about human development that will enhance service provision to clients across the lifespan." --Mary M. Chittooran, Saint Louis University "The writing style is clear, interesting and engaging and is at a level appropriate for my students. Nicely done. . . . [The] case studies [and] developmental psychopathology sections are strengths. . . . [The book is] well

organized, well-written, broad-based . . . , [and] insightful. [I] especially liked the authors' focus on practical and applied therapies, as well as their emphasis on research-based therapies that incorporate sound principles of human developmental." --Rosalie A. Rohm, Ball State University "This readable, well organized text addresses the depth and scope of development. The text extends students knowledge of the material by providing a wealth of applicable information for those who are or will be in a helping profession. . . . [Compared to other available texts, this one is] far superior in terms of the balance of scope and depth." --Kathryn Cooper, Northern Colorado University New Interactive, Multimedia Learning Features in the Video-Enhanced Pearson eText: o See real examples. Embedded videos illustrate and explain key concepts and show individuals addressing the challenges of that period of the life span. (See pages 334, 342, and 353 for examples.) o Practice applying chapter content. The Practice Using What You've Learned feature includes scaffolded video and print case exercises that challenge readers to analyze and apply chapter content. Sample responses are available through the enhanced text. (See page 366 for examples.) See how to work with people at different stages of the lifespan. Applications sections blend empirically supported information about treatments with the issues covered in each chapter, offering extensive discussion of how developmental science can inform practice. These include topics such as adolescent health and well-being, new approaches to maternity care, new interventions for promoting secure infant attachments, encouraging learning through play, helping parents avoid corporal punishment, and mindfulness-based practices, among many others. (See 357-360 for an example.)

Human Development Franco Imoda 1998 This book is a magisterial treatment of the wide spectrum of psychological aspects of growing in grace as a spiritual creature, while also developing as a human being. For the author 'being human' is physical, psychological, and spiritual. The integration of all three is for him a possibility both to be desired and worked toward, not a paradox. As a teacher of teachers, Imoda has been committed to transmitting to his students a way to teach novices and laymen how growing in the love of God is a logical development from increasing the grasp of their emotional bases. For teachers this book is a 'vade mecum' which gives them a structure within which people can be encouraged to explore their emotional underpinnings, so that they may grow out of their psychological and spiritual immaturity.

Life Span Motor Development Kathleen M. Haywood 2021-06-01 Life Span Motor Development, Seventh Edition With HKPropel Access, is a leading text for helping students examine and understand how interactions of the developing and maturing individual, the environment, and the task being performed bring about changes in a person's movements. This model of constraints approach, combined with an unprecedented collection of video clips marking motor development milestones, facilitates an unmatched learning experience for the study of motor development across the life span. The seventh edition expands the tradition of making the student's experience with motor development an interactive one. Related online learning tools delivered through HKPropel include more than 190 video clips marking

motor development milestones to sharpen observation techniques, with interactive questions and 47 lab activities to facilitate critical thinking and hands-on application. The lab activities may be assigned and tracked by instructors through HKPropel, along with chapter quizzes (assessments) that are automatically graded to test comprehension of critical concepts. The text also contains several updates to keep pace with the changing field: Content related to physical growth and development of the skeletal, muscle, and adipose systems is reorganized chronologically for a more logical progression. New material on developmental motor learning demonstrates the overlap between the disciplines of motor development and motor learning. New insights into motor competence help explain the relationship between skill development and physical fitness. The text helps students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person's movements over the life span, and describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person's movements. This edition comes with 148 illustrations, 60 photos, and 25 tables—all in full color—to help explain concepts and to make the text more engaging for students. It also retains helpful learning aids including chapter objectives, a running glossary, key points, sidebars, and application questions throughout each chapter. Life Span Motor Development, Seventh Edition, embraces an interactive and practical approach to illustrate the most recent research in motor development. Students will come away with a firm understanding of the concepts and how they apply to real-world situations. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.

The State of Food Security and Nutrition in the World 2018 Food and Agriculture Organization of the United Nations 2018-09-14 New evidence this year corroborates the rise in world hunger observed in this report last year, sending a warning that more action is needed if we aspire to end world hunger and malnutrition in all its forms by 2030. Updated estimates show the number of people who suffer from hunger has been growing over the past three years, returning to prevailing levels from almost a decade ago. Although progress continues to be made in reducing child stunting, over 22 percent of children under five years of age are still affected. Other forms of malnutrition are also growing: adult obesity continues to increase in countries irrespective of their income levels, and many countries are coping with multiple forms of malnutrition at the same time - overweight and obesity, as well as anaemia in women, and child stunting and wasting.
