Land Rover Design - 70 Years of Success Nick Hull 2018-11-20
A landmark new history from design journalist Nick Hull, Land Rover Design - 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the

spirit and ethos of Land Rover design and engineering.

Excerpt: The Ford Expedition is a full-size SUV built by the Ford Motor Company. Introduced in 1996 for the 1997 model year as a replacement to the Ford Bronco, it was previously slotted between the smaller Ford Explorer and the larger Ford Excursion, but as of the 2005 model year, it is Ford's largest and last truck-based, off-road and tow capable SUV. It has usually shared a platform and design with the Ford F-150 pickup truck. Ford currently offers the standard regular-sized model and the larger EL/Max model, succeeding the Excursion which was discontinued in 2005. It is the second Ford vehicle to use the Expedition name, as it was part of the Explorer Sport's trim models during the 1995 model year. All Expeditions were originally built in Wayne, Michigan. In 2009, Ford shifted its current third generation (2007-present) model production to Louisville, Kentucky when Ford converted the Wayne assembly plant to begin further production of the Focus. A fourth generation will arrive to dealers in 2014 or 2015. The Expedition offered up to nine passenger seating in model years before 2007 (with a front bench seat option); 2007-present offer 2 bucket seats in the first row. It is equipped with a V8 engine. It is similar to the Lincoln Navigator, especially for the 2007-present model in Limited or King Ranch high end trims; both of which were introduced for the 2005 model year. Factory 19 Dennis Glover 2020-11-03 We're told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA's owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He's going to defeat technology's dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times.' -Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' -Rohan Wilson

They Found Our Engineer Michael Bishop 2011 The British Land Rover 4x4 has grown from 1948 to become one of the world's leading automotive brands. Exactly how it all came together back in the late 1940's and early 50's has been the topic of interest and debate for many years. This was until two Australian enthusiasts, Michael Bishop and Alex Massey quite literally stumbled across senior member of the original Land Rover development team, Arthur Goddard living in Brisbane, Australia in 2009. The discovery led to many of the myths and tales surrounding the early vehicles to be heard as it happened from Arthur's point of view. Then to a trip by Arthur to visit his old work place in Solihull and to the vehicle that he helped bring to life back in 1948. The book contains both a technical and human side to this incredible story as well as a great reunion between Arthur and his old colleague Spen King who went onto design the Range Rover in the 1960's. This is truly a unique story from the time of post War

World two Britain to modern day Australia and how the iconic 4x4 grew up so quickly in the 1950's to become the world leader that it is today.

Range Rover Sport 2005-2013 James Taylor 2019-11-28 When the Range Rover Sport was launched in 2005, it was aimed at a new group of customers who in many cases would never have considered a Land Rover product before. These customers wanted and could afford a luxurious vehicle that was expensive to run; but they also wanted a very personalized vehicle that did not have the rather grand and conservative connotations of the full-size Range Rover. Brasher and more glamorous than its older sibling, the Sport was soon adopted by celebrities and others who expected to be noticed. *Range Rover Sport - The Complete Story* is the first book devoted specifically to the first-generation Range Rover Sport. It tells the story behind the development and launch of the vehicle; it explains the market reaction, including contemporary press reviews; provides details of each model with technical specification tables and colour and trip options; lists production figures and VIN identification and dating; details prices and sales figures for the UK, USA and Canada and finally, includes a useful chapter on buying and owning.

Deconstructing Brexit Discourses Benjamin Hawkins 2021-09-15 This book expands on and complements the burgeoning Brexit literature by placing the UK's vote to leave the EU in its longer historical and discursive contexts. It examines the embedded Euroscepticism, which has dominated British political discourse on the European project and the role of the UK within it for at least the last three decades. Brexit was the consequence of a consistent denigration of the European integration project in the public sphere in which the terrain, and the conceptual vocabulary, of debate were set by a dominant, right-wing Eurosceptic discourse. This framed the EU as inherently heterogeneous and antagonistic to the UK. The book examines how ideas of British exceptionalism, which underpin Eurosceptic discourses, are sustained and reproduced and offers an account of their enduring, affective power amongst the British population. It is in this context that it was possible for pro-Brexit campaigners to assemble and enthuse a new coalition of voters sufficient to deliver a 'leave' majority on 23 June 2016. This text will be of key interest to scholars and students of British, EU and European politics, the media and press, public opinion, political behaviour and nationalism studies.
