Lying Up a Storm Julia Cook 2015-01-15 A storm is brewing... Whenever Levi doesn't like the truth, he kinda, sorta makes up other stuff to say. One day his mother explains to him that telling lies will damage the trust of his friends and make him very sad. Whenever you tell a lie, your inside sun goes away. Then a lying cloud forms, and glooms up your day. Each time you tell a lie, another cloud starts to form, and before you can stop it from happening, your insides start to storm. This book is a great resource to help children understand not only the consequences of telling a lie, but also how one lie can often lead to telling several more. It will help parents and teachers understand that lying can be a normal and sometimes healthy response for a child and offers tools to help guide children toward truthfulness.

Mathematics Teacher Education in the Andean Region and Paraguay Yuriko Yamamoto Baldin 2018-10-04 This Open Access book is an excellent synthesis of the initial and continuing preparation for Mathematics Teaching in Bolivia, Ecuador, Paraguay and Peru, from which comparative analyses can be made that show similarities and differences, and highlight various perspectives. In February 2016, the 5th Capacity and Networking Project (CANP) workshop of the International Commission on Mathematical Instruction (ICMI) was held in Lima, Peru.

The coordination of this two-week workshop was undertaken by an international scientific committee (IPC), with equal participation by mathematicians and mathematics educators from the region and from the international ICMI and IMU community. The goal of CANP5 was to improve the quality of mathematics education in the region, which led to the main theme of the scientific program "Initial and Continued Teacher Education". Country Reports on the main theme of teacher education systems for each country in this region were presented and discussed to detect common issues that might be improved through a collaborative network. One of the most important results of this event was the creation of a Mathematics Education Network, namely the Comunidad de Educación Matemática de América del Sur - CEMAS. This book brings to the international Educational Community an important collection of experiences and ideas in the Mathematics Education of four Latin-American countries in the developing Andean region and Paraguay. The dissemination of these results can promote the search for international collaborative actions in a wider scale.
