Going Up the River Joseph T. Hallinan 2003-07-08 The American prison system has grown tenfold in thirty years, while crime rates have been relatively flat: 2 million people are behind bars on any given day, more prisoners than in any other country in the world — half a million more than in Communist China, and the largest prison expansion the world has ever known. In *Going Up The River*, Joseph Hallinan gets to the heart of America ' s biggest growth industry, a self-perpetuating prison-industrial complex that has become entrenched without public awareness, much less voter consent. He answers, in an extraordinary way, the essential question: What, in human terms, is the price we pay? He has looked for answers to that question in every corner of the " prison nation, " a world far off the media grid — the America of struggling towns and cities left behind by the information age and desperate for jobs and money. Hallinan shows why the more prisons we build, the more prisoners we create, placating everyone at the expense of the voiceless prisoners, who together make up one of the largest migrations in our nation ' s history.

Management Strategies in Disturbances and with Gangs/disruptive Groups 1992 In discussing the management of prison gangs and disruptive groups, the manual advises that the strategy should be to respond to the specific nature of the problem. Where gang activity is rare and a gang culture is not in place, the transfer of gang members out of State may be an effective preventive mechanism. Where gang membership is large, but is only a small proportion of the inmate population, effective control may be achieved by housing known gang members in separate facilities. Where gangs are already entrenched in the institutional culture, prisons must find strategies, such as gang intelligence programs and prosecutorial units, to lessen the impact of gang activities on the nongang inmate population and to reduce gang influence. In examining institutional disturbances, the manual addresses the causes of disturbances, stages in the development of a major disturbance, early warning systems, the management of institutional disturbances, specialized resources for institutional control, and a return to normalcy. A section on staff training discusses general legal considerations in training, the role of the training academy versus the role of the institution, training exercises, and training for special units. Other sections of the manual address post-disturbance activities, case studies, and legal aspects of the management of prison gangs and disturbances.

Inside This Place, Not of It Ayelet Waldman 2017-07-25 *Inside This Place, Not of It* reveals some of the most egregious human rights violations within women ' s prisons in the United States. Here, in their own words, thirteen narrators recount their lives leading up to incarceration and their harrowing struggle for survival once inside. Among the narrators: Theresa, who spent years believing her health and life were in danger, being aggressively treated with a variety of medications for a disease she never had. Only on her release did she discover that an incompetent prison medical bureaucracy had misdiagnosed her with HIV. Anna, who repeatedly warned apathetic prison guards about a suicidal cellmate. When the woman killed herself, the guards punished Anna in an attempt to silence her and hide their own negligence. Teri, who was sentenced to up to fifty years for aiding and abetting a robbery when she was only seventeen. A prison guard raped Teri, who was still a teenager, and the assaults continued for years with the complicity of other staff.

Make a Difference Gary MacDougal 2005-05 We now know the answers to helping long time welfare recipients become self-sufficient, and how to pry loose the dead hand of human service bureaucracies. "I enjoy coming to work and learning different things...I really like my kids to know I work...This should have happened 10 years ago...I believe many of my friends wouldn't do no drugs if they had a chance for a real job." - Rebecca, a woman from Chicago's notorious housing projects, high school dropout and former welfare recipient now working at UPS. The problems with welfare systems is not a lack of funds, but rather failure to connect the funds to families and communities in a way that makes a difference in people's lives. Through involvement with welfare recipients, community leaders, caseworkers and others, author Gary MacDougal and Illinois Governor Jim Edgar led the state government in its biggest reorganization since 1900, creating a model for the rest of the nation.

[The Big House](#) Stephen D. Cox 2009-11-03 "'The Big House' is America's idea of the prison - a huge, tough, ostentatiously oppressive pile of rock, bristling with rules and punishments, overwhelming in size and the intent to intimidate. Stephen Cox tells the story of the American prison - its politics, its sex, its violence, its inability to control itself - and its idealization in American popular culture. This book investigates both the popular images of prison and the realities behind them : problems of control and discipline, maintenance and reform, power and sexuality. It conveys an awareness of the limits of human and institutional power, and of the symbolic and iconic qualities the "Big House" has attained in America's understanding of itself"--Jacket.

Hell Is a Very Small Place Jean Casella 2014-11-11 " An unforgettable look at the peculiar horrors and humiliations involved in solitary confinement " from the prisoners who have survived it (New York Review of Books). On any given day, the United States holds more than eighty-thousand people in solitary confinement, a punishment that—beyond fifteen days—has been denounced as a form of cruel and degrading treatment by the UN Special Rapporteur on Torture. Now, in a book that will add a startling new dimension to the debates around human rights and prison reform, former and current prisoners describe the devastating effects of isolation on their minds and bodies, the solidarity expressed between individuals who live side by side for years without ever meeting one another face to face, the ever-present specters of madness and suicide, and the struggle to maintain hope and humanity. As Chelsea Manning wrote from her own solitary confinement cell, " The personal accounts by prisoners are some of the most disturbing that I have ever read. " These firsthand accounts are supplemented by the writing of noted experts, exploring the psychological, legal, ethical, and political dimensions of solitary confinement. " Do we really think it makes sense to lock so many people alone in tiny cells for twenty-three hours a day, for months, sometimes for years at a time? That is not going to make us safer. That ' s not going to make us stronger. " —President Barack Obama " Elegant but harrowing. " —San Francisco Chronicle " A potent cry of anguish from men and women buried way down in the hole. [Prisons and the American Conscience](#) Paul W. Keve 1995 In tracing the evolution of federal imprisonment, Paul W. Keve emphasizes the ways in which corrections history has been affected by and is reflective of other trends in the political and cultural life of the United States. The federal penal system has undergone substantial evolution over two hundred years. Keve divides this evolutionary process into three phases. During the first phase, from 1776 through the end of the nineteenth century, no federal prisons existed in the United States. Federal prisoners were simply boarded in state or local facilities. It was in the second phase, starting with the passage of the Three Prison Act by Congress in 1891, that federal facilities were constructed at Leavenworth and Atlanta, while the old territorial prison at McNeil Island in Washington eventually became, in effect, the third prison. In this second phase, the federal government began the enormous task of providing its own prison cells. Still, there was no effective supervisory force to make a prison system. In 1930, the Federal Bureau of Prisons was created, marking the third phase of the prison system ' s evolution. The Bureau, in its first sixty years of existence, introduced numerous correctional innovations, thereby building an effective, centrally controlled prison system with progressive standards. Keve details the essential characteristics of this now mature system, guiding the reader through the historical process to the present day.

Right to Be Hostile Erica R. Meiners 2010-11-01 In *Right to be Hostile*, scholar and activist Erica Meiners offers concrete examples and new insights into the "school to prison" pipeline phenomenon, showing how disciplinary regulations, pedagogy, pop culture and more not only implicitly advance, but actually normalize an expectation of incarceration for urban youth. Analyzed through a framework of an expanding incarceration nation, Meiners demonstrates how educational practices that disproportionately target youth of color become linked directly to practices of racial profiling that are endemic in state structures. As early as preschool, such educational policies and practices disqualify increasing numbers of students of color as they are funneled through schools as under-educated, unemployable, 'dangerous,' and in need of surveillance and containment. By linking schools to prisons, Meiners asks researchers, activists, and educators to consider not just how our schools' physical structures resemble prisons— metal detectors or school uniforms— but the tentacles in policies, practices and informal knowledge that support, naturalize, and extend, relationships between incarceration and schools. Understanding how and why prison expansion is possible necessitates connecting schools to prisons and the criminal justice system, and redefining "what counts" as educational policy.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Speak Softly and Carry a Big Stick Monica E. Summers 2017 Current theoretical research focusing on prison violence suggests that staff culture might influence inmate behavior. Correctional officers have the most interaction with inmates, and a crucial aspect of achieving staff and institutional legitimacy involves treating inmates in a procedurally just fashion. Literature suggests that procedural justice in prisons relies on comprehensive care; inmates require dignity, respect, safety, and individualized treatment focused on successful community reentry. Since correctional officers vary in their capacity to convey legitimacy, individual characteristics such as officer gender might influence inmate perceptions, thereby affecting inmate behavior. The presence of women may symbolize a representative bureaucracy, and women may perform job duties differently based on preconceived attitudes, socialization, and predispositions to avoid violence. This project utilizes four waves of the Census of State and Federal Correctional Facilities (1990-2005) to examine the relative effects of the percentage women correctional officers on inmate-on-inmate and inmate-on-staff violence, assess whether these effects take

time, and evaluate interactional effects between gender and institutional characteristics. Although some models are supportive of the argument that women officers affect prison violence, findings indicate that other factors are more important determinants.

Colored People Henry Louis Gates, Jr. 2011-07-06 In a coming-of-age story as enchantingly vivid and ribald as anything Mark Twain or Zora Neale Hurston, Henry Louis Gates, Jr., recounts his childhood in the mill town of Piedmont, West Virginia, in the 1950s and 1960s and ushers readers into a gossip, of lye-and-mashed-potato “ processes,” and of slyly stubborn resistance to the indignities of segregation. A winner of the Chicago Tribune ’ s Heartland Award and the Lillian Smith Prize, *Colored People* is a pungent and poignant masterpiece of recollection, a work that extends and deepens our sense of African American history even as it entrances us with its bravura storytelling

Intervention & Strategies in Counseling and Psychotherapy Richard E. Watts 2013-08-21 Psychology has recently shifted toward a phenomenological approach closely aligned with theories originally put forth by noted psychologist Alfred Adler. However, modern approaches are often presented in a language that differs from the original theories, with no acknowledgment to the contributions of Adler. *Interventions and Strategies in Counseling and Psychotherapy* corrects this oversight, illustrating the many ways in which Adlerian ideas underpin and influence contemporary therapeutic approaches. Original chapters by leading thinkers in the field address the practice of counseling and psychotherapy from a social-cognitive perspective and logically combine classic Adlerian theories with proven and effective methods from other approaches. The book covers a wide range of topics including play therapy, parent education, couples therapy, and problem-solving counseling. This book is essential reading not only for Adlerian psychologists, but also counselors, psychologists, and psychotherapists of any theoretical stripe who wish to keep their practical skills up-to-date. It is also of use to graduate and doctoral students enrolled in counseling and psychology programs.

Handbook of Public Pedagogy Jennifer A. Sandlin 2010-07-29 Bringing together scholars, public intellectuals, and activists from across the field of education, the *Handbook of Public Pedagogy* explores and maps the terrain of this burgeoning field. For the first time in one comprehensive volume, readers will be able to learn about the history and scope of the concept and practices of public pedagogy. What is 'public pedagogy'? What theories, research, aims, and values inform it? What does it look like in practice? Offering a wide range of differing, even diverging, perspectives on how the 'public' might operate as a pedagogical agent, this Handbook provides new ways of understanding educational practice, both within and without schools. It implores teachers, researchers, and theorists to reconsider their foundational understanding of what counts as pedagogy and of how and where the process of education occurs. The questions it raises and the critical analyses they require provide curriculum and educational workers and scholars at large with new ways of understanding educational practice, both within and without schools.

Terror Town, USA John Ferak 2021-07-27 The veteran true crime author chronicles the terrifying murders, surprising arrest and dramatic trial of Illinois serial killer Milton Johnson. In the summer of 1983, an elusive serial killer stalked the blue-collar industrial city of Joliet, Illinois. One overnight killing spree took five victims, including members of the Will County Sheriff ’ s Office. The following month brought a quadruple murder inside a shop known for its pottery classes. The plague of violence sparked the controversial New York City-based Guardian Angels to descend on Joliet, generating more unwanted media attention for the community. The National Enquirer labeled Joliet “ Terror Town, U.S.A. ” With an arrest that seemed to come out of nowhere, authorities linked their suspect to a chilling fourteen homicides, plus three women who miraculously survived their agonizing encounters. But with multiple murder trials on the horizon, it remained anyone ’ s guess whether Milton Johnson was guilty of mass murder and if so, would he die by means of lethal injection at the Illinois Department of Corrections?

The Growth of Incarceration in the United States Committee on Causes and Consequences of High Rates of Incarceration

2014-12-31 After decades of stability from the 1920s to the early 1970s, the rate of imprisonment in the United States has increased fivefold during the last four decades. The U.S. penal population of 2.2 million adults is by far the largest in the world. Just under one-quarter of the world's prisoners are held in American prisons. The U.S. rate of incarceration, with nearly 1 out of every 100 adults in prison or jail, is 5 to 10 times higher than the rates in Western Europe and other democracies. The U.S. prison population is largely drawn from the most disadvantaged part of the nation's population: mostly men under age 40, disproportionately minority, and poorly educated. Prisoners often carry additional deficits of drug and alcohol addictions, mental and physical illnesses, and lack of work preparation or experience. The growth of incarceration in the United States during four decades has prompted numerous critiques and a growing body of scientific knowledge about what prompted the rise and what its consequences have been for the people imprisoned, their families and communities, and for U.S. society. *The Growth of Incarceration in the United States* examines research and analysis of the dramatic rise of incarceration rates and its affects. This study makes the case that the United States has gone far past the point where the numbers of people in prison can be justified by social benefits and has reached a level where these high rates of incarceration themselves constitute a source of injustice and social harm. *The Growth of Incarceration in the United States* examines policy changes that created an increasingly punitive political climate and offers specific policy advice in sentencing policy, prison policy, and social policy. The report also identifies important research questions that must be answered to provide a firmer basis for policy. This report is a call for change in the way society views criminals, punishment, and prison. This landmark study assesses the evidence and its implications for public policy to inform an extensive and thoughtful public debate about and reconsideration of policies.

Beyond Recidivism Andrea Leverentz 2020-05-05 Understanding reentry experiences after incarceration Prison in the United States often has a revolving door, with droves of formerly incarcerated people ultimately finding themselves behind bars again. In *Beyond Recidivism*, Andrea Leverentz, Elsa Y. Chen, and Johnna Christian bring together a leading group of interdisciplinary scholars to examine this phenomenon using several approaches to research on recently released prisoners returning to their lives. They focus on the social context of reentry and look at the stories returning prisoners tell, including such key issues as when they choose to reveal (or not) their criminal histories. Drawing on contemporary studies, contributors examine the best ideas that have emerged over the last decade to understanding the challenges prisoners face upon reentering society. Together, they present a complete picture of prisoner reentry, including real-world recommendations for policies to ensure the well-being of returning prisoners, regardless of their past mistakes.
