Sweating the Metal Alex Duncan 2011-06-09 With bullets flying, wounded soldiers scream out in pain as the Chinook comes in to land in one of the most dangerous parts of Afghanistan. At the machine's controls is one man and if he doesn't stay calm then everyone could die. That man is Flt Lt Alex 'Frenchie' Duncan DFC and he's been involved in some of the most daring and dangerous missions undertaken by the Chinook force in Afghanistan. In this book he recounts his experiences of life under fire in the dust, heat and bullets of an active war zone. At 99ft long, the Chinook is a big and valuable target to the Taliban, who will stop at nothing to bring one down. And yet Frenchie and his crew risk everything because they know that the troops on the front line are relying on them. Sweating the Metal is the true story of the raw determination and courage of men on the front line - and it's time for their story to be told.

Now It Can Be Told (WWI Centenary Series) Philip Gibbs 2016-03-10 "In this book I have written about some aspects of the war which, I believe, the world must know and remember, not only as a memorial of men's courage in tragic years, but as a warning of what will happen again-surely-if a heritage of evil and of folly is not cut out of the hearts of peoples. Here it is the reality of modern warfare not only as it appears to British soldiers, of whom I can tell, but to soldiers on all the fronts where conditions were the same." This book is part of the World War One Centenary series; creating, collating and reprinting new and old works of poetry, fiction, autobiography and analysis. The series forms a commemorative tribute to mark the passing of one of the world's bloodiest wars, offering new perspectives on this tragic yet fascinating period of human history. Each publication also includes brand new introductory essays and a timeline to help the reader place the work in its historical context.

The Cultural Cold War Frances Stonor Saunders 2013-11-05 During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard

Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (The Wall Street Journal), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

Brilliantly written with some incredible and astonishing stories; it is gripping, moving, emotional and sometimes humorous – just perfect' Squadron Leader (Ret) Clive Rowley, former Officer Commanding RAF Battle Of Britain Memorial Flight 'A superb journey through the remarkable tale of that British icon, the Spitfire. Brilliantly and engagingly written, this is the most readable story of the aircraft and her pilots that I have ever had the pleasure to read in a period spanning some forty-odd years of personal study and research. Truly stunning.' Andy Saunders, Editor, Britain at War Magazine. The perfect complementary narrative to the bestselling memoir by Geoffrey Wellum – First Light. Achtung, Spitfire! The iconic Spitfire found fame during the darkest early days of World War II. But what happened to the redoubtable fighter and its crews beyond the Battle of Britain, and why is it still so loved today? In late spring 1940, Nazi Germany's domination of Europe had looked unstoppable. With the British Isles in easy reach since the fall of France, Adolf Hitler was convinced that Great Britain would be defeated in the skies over her southern coast, confident his Messerschmitts and Heinkels would outclass anything the Royal Air Force threw at them. What Hitler hadn't planned for was the agility and resilience of a marvel of British engineering that would quickly pass into legend – the Spitfire. Bestselling author John Nichol's passionate portrait of this magnificent fighter aircraft, its many innovations and updates, and the people who flew and loved them, carries the reader beyond the dogfights over Kent and Sussex. Spanning the full global reach of the Spitfire's deployment during WWII, from Malta to North Africa and the Far East, then over the D-Day beaches, it is always accessible, effortlessly entertaining and full of extraordinary spirit. Here are edge-of-the-seat stories and heart-stopping first-hand accounts of battling pilots forced to bail out over occupied territory; of sacrifice and wartime love; of aristocratic female flyers, and of the mechanics who braved the Nazi onslaught to keep the aircraft in battle-ready condition. Nichol takes the reader on a hair-raising, nail-biting and moving wartime history of the iconic Spitfire populated by a cast of redoubtable, heroic characters that make you want to stand up and cheer.

Going Solo Roald Dahl 2018-05-17 'They didn't think for one moment that they would find anything but a burnt-out fuselage and a charred skeleton; and they were apparently astounded when they came upon my still-breathing body, lying in the sand near by' In 1938 Roald Dahl was fresh out of school and bound for his first job in Africa, hoping to find adventure far from home. However, he got far more excitement than he bargained for when the outbreak of the Second World War led him to join the RAF. His account of his experiences in Africa, crashing a plane in the Western Desert, rescue and recovery from his horrific injuries in Alexandria, and many other daring deeds, recreates a world as bizarre and unnerving as any he wrote about in his fiction.

Tail-End Charlies John Nichol 2007-04-01 Night after night they stifled their fears and flew through flak and packs of enemy fighters to drop the bombs that would demolish the Third Reich. The airmen of the United States 8th Army Air Force American and British Bomber Command were among the greatest heroes of the Second World War, defying Hitler in the darkest early days of the war and taking the battle to the German homeland when no one else would. Toward the end of the conflict, too, they continued to sacrifice their lives to shatter an enemy sworn never to surrender. Blasted out of the sky in an instant or bailing out from burning aircraft to drop helplessly into hostile hands, they would die in their tens of thousands to ensure the enemy's defeat. Especially vulnerable were the "tail-end Charlies"---for the Americans, which meant two things: the gunners who flew countless missions in a plexiglass bubble at the back of the bomber, and the last bomber in the formation who ended up flying through the most hell, and for the British, the rear-gunners who flew operations in a Plexiglas bubble at the back of the bomber. Following their groundbreaking revelations about the ordeals suffered by Allied prisoners of war in their bestselling book, *The Last Escape*, John Nichol and Tony Rennell tell the astonishing and deeply moving story of the controversial last battles in the skies of Germany through the eyes of the forgotten heroes who fought them. "This is the best account that has been written of the heroic American and British bomber crews . . . the best of its kind." ---George McGovern "Rivaling the best of Stephen Ambrose's work, *Tail-End Charlies* gives a breathtakingly intimate look at the lives, loves, and deaths of the brave airmen of the greatest generation. This fascinating book is as valuable for its stories of joyous life on the ground as it is for its sobering tales of death in the air. You see the whole picture of the war here from the eyes of the strong young men who fought it." ---Walter J. Boyne, bestselling author of *Beyond the Wild Blue* "Adds new dimensions to the saga of the air war in Europe. The eyewitness accounts, reported within the context of the battle against Nazi Germany, provide a sense of the ordeals, the terror, the gore, and the heroism of ordinary men thrust into the savagery of aerial combat." ---Gerald Astor, author of *The Mighty Eighth*

In Cold War Skies Michael Napier 2020-08-20 Throughout the second half of the 20th century, international relations across the globe were dominated by the Cold War. Bullets & Billets (WWI Centenary Series) Bruce Bairnsfather 2016-03-10 "Down South, in the Valley of the Somme, far from the spots recorded in this book, I began to write this story. In billets it was. I strolled across the old farmyard and into the wood beyond. Sitting by a gurgling little stream, I began, with the aid of a notebook and a pencil, to record the joys and sorrows of my first six months in France. I do not claim any unique quality for these experiences. Many thousands have had the same. I have merely, by request, made a record of my times out there, in the way that they appeared to me." This book is part of the World War One Centenary series; creating, collating and reprinting new and old works of poetry, fiction, autobiography and analysis. The series forms a commemorative tribute to mark the passing of one of the world's bloodiest wars, offering new perspectives on this tragic yet

Tornado John Nichol 2021-06-10 Former Tornado Navigator John Nichol tells the incredible story of the RAF Tornado force during the First Gulf War in 1991; the excitement and the danger, the fear and the losses. It is an extraordinary account of courage and fortitude. 'We were doing about 620 miles-per-hour, 200 feet above the desert, in total darkness. Everything was running on rails as we approached the target. Then all hell broke loose. I remember the missile being fired at us; I broke left and shouted, "Chaff!" 'All I could see was a flame, like a very large firework, coming towards me. Then there was a huge white flash. I remember an enormous wind and then I was knocked unconscious. My last thoughts were that I was going to die.' In 1990, Iraqi dictator Saddam Hussein ordered the invasion and occupation of neighbouring Kuwait, setting in motion a chain of events that had unimaginable political, military and personal repercussions, which still reverberate around the globe today. This is the story of the aircrew at the heart of Operation Desert Storm, almost none of whom had any prior experience of armed combat. It is the story of the Tornado's missions, of those who did not return - and of the families who watched and waited as one of the most complex conflicts in recent history unfolded live on television. It is a story of untold fear and suffering, and astounding courage in the face of hitherto unimaginable adversity.

Hot, Hot Chicken Rachel Louise Martin 2021-03-15 These days, hot chicken is a "must-try" Southern food. Restaurants in New York, Detroit, Cambridge, and even Australia advertise that they fry their chicken "Nashville-style." Thousands of people attend the Music City Hot Chicken Festival each year. The James Beard Foundation has given Prince's Chicken Shack an American Classic Award for inventing the dish. But for almost seventy years, hot chicken was made and sold primarily in Nashville's Black neighborhoods—and the story of hot chicken says something powerful about race relations in Nashville, especially as the city tries to figure out what it will be in the future. Hot, Hot Chicken recounts the history of Nashville's Black communities through the story of its hot chicken scene from the Civil War, when Nashville became a segregated city, through the tornado that ripped through North Nashville in March 2020.

A Thesaurus of English Word Roots Horace Gerald Danner 2014-03-27 Horace G. Danner's A Thesaurus of English Word Roots is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of

words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, *dysacousia*, *hyperacousia*. These root-starting terms then are followed by terms where the root falls behind the word, e.g., *acouesthesia* and *acoumeter*. These words are followed by words where the root falls in the middle or the end, as in such terms as *bradyacusia* and *odynacosis*. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

The Seventeenth Highland Light Infantry (Glasgow Chamber of Commerce Battalion) (WWI Centenary Series) John W. Arthur 2016-03-11 "In compiling and editing this history of the Chamber of Commerce Battalion, the aim of the editors has been to present such a narrative as will provide a detailed but not overburdened account of the Battalion's movements and operations throughout the years of its existence, and at the same time give a representative impression of the various outstanding events which have built up the character and the traditions of the unit. In accordance with the wishes of the History Committee, the narrative dealing with Field service has been kept within the limits of the Battalion's share in the campaign, and accordingly no attempt has been made to give any picture of the relative positions of the various other units operating with the 17th, or of the general strategic import of the actions described." This book is part of the World War One Centenary series; creating, collating and reprinting new and old works of poetry, fiction, autobiography and analysis. The series forms a commemorative tribute to mark the passing of one of the world's bloodiest wars, offering new perspectives on this tragic yet fascinating period of human history. The Last Enemy Richard Hillary 2018-05 In 1918, the RAF was established as the world's first independent air force. Hilary was shot down during the Battle of Britain, leading to months in hospital as part of Archibald McIndoe's 'Guinea Pig Club', undergoing pioneering plastic surgery to rebuild his face and hands. Lancaster John Nichol 2020-05-28 'The epic story of an iconic aircraft and the breathtaking courage of those who flew her' Andy McNab, bestselling author of Bravo Two Zero 'Compelling, thrilling and rooted in quite extraordinary human drama' James Holland, author of Normandy 44 From John Nichol, the Sunday Times bestselling author of Spitfire, comes a passionate and profoundly moving tribute to the Lancaster bomber, its heroic crews and the men and women who kept her airborne during the country's greatest hour of need. 'The Avro Lancaster is an aviation icon; revered, romanticised, loved. Without her, and the bravery of those who flew her, the freedom we enjoy today would not exist.' Sir Arthur Harris, the controversial chief of Royal Air Force Bomber Command, described the Lancaster as his 'shining sword' and the 'greatest single factor in winning the war'. RAF bomber squadrons carried out offensive operations from the first day of the Second World War until the very

last, more than five and a half years later. They flew nearly 300,000 sorties and dropped around a million tons of explosives, as well as life-saving supplies. Over 10,000 of their aircraft never returned. Of the 7,377 Lancasters built during the conflict, more than half were lost to enemy action or training accidents. The human cost was staggering. Of the 125,000 men who served in Bomber Command, over 55,000 were killed and another 8,400 were wounded. Some 10,000 survived being shot down, only to become prisoners of war. In simple, brutal terms, Harris's aircrew had only a 40 per cent chance of surviving the war unscathed. Former RAF Tornado Navigator, Gulf War veteran and bestselling author John Nichol now tells the inspiring and moving story of this legendary aircraft that took the fight deep into the heart of Nazi Germany.

RAF's Centenary Flypast Kevin Lee Gatland 2021-05-30 On 10 July 2018, exactly 100 years and 100 days after the formation of the world's first independent air force, 103 aircraft of twenty-four types from twenty-five squadrons flew over London in the largest formation of military aircraft seen over the capital of the UK in nearly thirty years. Involving over 250 aircrew and operating out of fourteen military and two civilian airfields, with nineteen back-up aircraft and a standby air-to-air refueling tanker, the Royal Air Force put on a unrivaled display to mark the centenary of its creation on 1 April 1918, in the closing months of the First World War. Exemplifying that long and proud history, was the Spitfire, Hurricane, Lancaster and Dakota of the Memorial Flight, as well as the enduring Hercules, with the newly acquired F-35B Lightning displaying the RAF's continuing global importance. This book reveals how the flypast was conceived and examines the detailed planning involved in the event, written by someone who would know – the project manager and coordinator. The composition and size of the flypast was truly momentous, comprising virtually every type of aircraft that the RAF operated at the time. As Chief of Staff at the Tornado GR4 Force Headquarters operating from RAF Marham, and an experienced Tornado GR4 Navigator, Wing Commander Kevin Gatland had the task of pulling together all the necessary components, both military and civilian required to produce an unrivaled aerial display. This involved considering the feasibility of assembling so many varied types of aircraft, all with different speeds and capabilities, in addition to concentrating them into a tight schedule to produce a virtually continuous stream of aircraft over central London, with elements breaking off to pass over the northerly runway at Heathrow Airport, the RAF Memorial at Runnymede, Windsor Castle and the RAF Museum at Hendon. Beautifully illustrated with glorious color in-flight photographs of the magnificent aircraft of the current RAF as well as the briefing and planning session, this book demonstrates the enormous range of factors that had to be taken into consideration to produce the amazing spectacle that was witnessed by the Queen from Buckingham Palace and the thousands who gathered in The Mall – an event captured in the pages of this fascinating book.

The Last Enemy Richard Hillary 2014-11-10 This is the true story of Second World War fighter pilot, Richard Hillary. After being shot down in September 1940, Hillary spent several months in hospital, undergoing numerous operations; a member of Archibald McIndoe's 'Guinea Pig Club'. Originally published in 1942, just months before he died in a second crash, The Last Enemy recounts the struggles and successes of a young man in the Royal Air Force. Told through Hillary's eyes, this incredible story shows that even in our darkest moments there is a glimmer of enduring hope.

Home Run John Nichol 2008 Throughout the Second World War, thousands found themselves cut off behind the lines in Nazi-occupied Europe ♦ soldiers were left stranded on beaches after the chaotic evacuation of Dunkirk, airmen flying operations against the Germans were blasted out of the sky by flak and fighters. They were alone and on the run in enemy territory with just one goal ♦ to get back to Britain and to safety. Some made solitary treks through hundreds of miles of enemy territory, others attempted precarious sea crossings in stolen boats. Many placed their lives in the hands of brave civilians who risked the wrath of a brutal regime if they dared to offer assistance. Life for the evaders hung in the balance and if they were to survive they had to rely on guile and sheer luck. John Nichol and Tony Rennell tell the dramatic story of the heroes who made it home . . . and those who did not.

Twin Sanity Susanna Pippel 2016-12-17 An Air Force wife and mother of identical twins, Susanna teaches sanity-saving strategies to help parents handle the logistics of caring for multiples-even without having family nearby or hiring extra help. Sanity-saving topics include: Preparing for two babies-what parents really need to buy and where they can find it (without breaking the bank!)* Maternity wear for an expectant (and expanding) mom of two* Bed rest, labor, delivery, and the possibility of premies* Breastfeeding twins-yes, it can be done!* Sleep-how to get it sooner rather than later* The daily routine-the sanity-saving details that new parents crave about how they will successfully manage caring for two babies. With a master's degree in education and experience as a second grade and fifth grade teacher, Susanna understood how to manage a classroom, but found few resources on how to manage caring for two infants. Twin Sanity provides soothing encouragement to new and expectant parents of twins, both through practical, research-based how-tos and "I've been there, thought that, you're not going crazy" journal excerpts from when the author was an expectant mother of twins, herself. "Susanna's book was my go-to survival guide my first year of twin mommyhood." -Julie-Rose Tedrick "I wish I'd had this book when my twins were born! This is the best advice book for twins that I've seen. I highly recommend this book for any mom (or dad) expecting twins!" -Ellengray Schroeder Immediate Response Mark Hammond 2009 launched their biggest operation yet: a complicated, high-risk airborne assault that send a fleet of heavily armed helicopters into the Afghan Heart of Darkness. And then a report came over the net that one of the Chinooks was down." --Book Jacket.*

RAF's Centenary Flypast Kevin Lee Gatland 2021-05-30 On 10 July 2018, exactly 100 years and 100 days after the formation of the world's first independent air force, 103 aircraft of twenty-four types from twenty-five squadrons flew over London in the largest formation of military aircraft seen over the capital of the UK in nearly thirty years. Involving over 250 aircrew and operating out of fourteen military and two civilian airfields, with nineteen back-up aircraft and a standby air-to-air refueling tanker, the Royal Air Force put on a unrivaled display to mark the centenary of its creation on 1 April 1918, in the closing months of the First World War. Exemplifying that long and proud history, was the Spitfire, Hurricane, Lancaster and Dakota of the Memorial Flight, as well as the enduring Hercules, with the newly acquired F-35B Lightning displaying the RAF's continuing global importance. This book reveals how the flypast was conceived and examines the detailed planning involved in the event, written by someone who would know – the project manager and coordinator. The composition and size of the flypast was truly momentous, comprising virtually every type of aircraft that the RAF operated at the time. As Chief of Staff at the Tornado GR4 Force Headquarters operating from RAF Marham,

and an experienced Tornado GR4 Navigator, Wing Commander Kevin Gatland had the task of pulling together all the necessary components, both military and civilian required to produce an unrivaled aerial display. This involved considering the feasibility of assembling so many varied types of aircraft, all with different speeds and capabilities, in addition to concentrating them into a tight schedule to produce a virtually continuous stream of aircraft over central London, with elements breaking off to pass over the northerly runway at Heathrow Airport, the RAF Memorial at Runnymede, Windsor Castle and the RAF Museum at Hendon. Beautifully illustrated with glorious color in-flight photographs of the magnificent aircraft of the current RAF as well as the briefing and planning session, this book demonstrates the enormous range of factors that had to be taken into consideration to produce the amazing spectacle that was witnessed by the Queen from Buckingham Palace and the thousands who gathered in The Mall – an event captured in the pages of this fascinating book.

Tornado Down John Nichol 2018-05-17 In 1918, the RAF was established as the world's first independent air force. To mark the 100th anniversary of its creation, Penguin are publishing the Centenary Collection, a series of six classic books highlighting the skill, heroism esprit de corps that have characterised the Royal Air Force throughout its first century. In Tornado Down, John Peters and John Nichol tell the incredible story of their part in the war against Saddam Hussien's regime. It is a brave and shocking and totally honest story: a story about war and its effects on the hearts and minds of men. The Centenary Collection: 1. The Last Enemy by Richard Hillary 2. Tumult in the Clouds by James Goodson 3. Going Solo by Roald Dahl 4. First Light by Geoffrey Wellum 5. Tornado Down by John Peters & John Nichol 6. Immediate Response by Mark Hammond

The Last Enemy Richard Hillary 2018-05-17 In 1918, the RAF was established as the world's first independent air force. To mark the 100th anniversary of its creation, Penguin are publishing the Centenary Collection, a series of six classic books highlighting the skill, heroism and esprit de corps that have characterised the Royal Air Force throughout its first century. The Last Enemy is Richard Hillary's extraordinary account of his experience as a Spitfire pilot in the Second World War. Hillary was shot down during the Battle of Britain, leading to months in hospital as part of Archibald McIndoe's 'Guinea Pig Club', undergoing pioneering plastic surgery to rebuild his face and hands. The Last Enemy was first published in 1942, just seven months before Hilary's untimely death in a second crash and has gone on to be hailed as one of the classic texts of World War II.

The Royal Air Force Michael Napier 2018-02-22 The world's first independent air force, the Royal Air Force celebrates its centenary in 2018. In the 100 years since the end of World War I, the service has been involved in almost continuous operations around the globe, giving the RAF the longest and most wide-ranging history of any air force in the world. But over the years this history has also become entangled with myths. The Royal Air Force: A Centenary of Operations will set the record straight, dispelling these as it uncovers – in both words and photographs – the true exploits and accomplishments of RAF personnel over the last 100 years. From its formation as an independent service in the dying days of World War I, its desperate fight against the Axis air forces in World War II, to its commitments during both the Cold War and modern times, this is the complete story of how the RAF has defended Britain for a century.
