Probably because she used to be one. Environmental issues, civil rights, education—you name it, she's probably been involved in a protest. When her latest cause lands her in jail for a few hours, she meets Silas Moore. He's in for a different kind of fighting. And though he's arrogant and not at all her type, she can't help being fascinated with him. Yet another lost cause. Football and trouble are the only things that have ever come naturally to Silas. And it's trouble that lands him in a cell next to do-gooder Dylan. He's met girls like her before—fixers, he calls them, desperate to heal the damage and make him into their ideal boyfriend. But he doesn't think he's broken, and he definitely doesn't need a girlfriend trying to change him. Until, that is, his anger issues and rash decisions threaten the only thing he really cares about, his spot on the Rusk University football team. Dylan might just be the perfect girl to help. Logic Programming Marcus J. Lambert 2014 Prolog for logic programming is one of the most intensively studied software languages in the 1980s. During the same period, the data-flow model for parallel computation attracted a lot of attention of researchers in the computer science; hence, it was very natural that several approaches were tried toward combining the two and implementing logic programs in parallel machines with the data-flow architecture. These approaches, however, were rather indirect ones in the sense that they developed programs describing AND/OR-parallelism for deduction using a data-flow language and executed them in a data-flow computer, and yet did not devise a direct model for parallel execution (reasoning) of a logic program. This book discusses fuzzy logic inferencing for Prolog; dislog; SEProlog; and provides direct graphical representations of first-order logic for inference.
